

About CLSS

Charles Leonard Steel Services, LLC was formed in June 2001 by Charles Fenderson and Leonard Severini.

CLSS was created to supply metal fabrication for our sister company, Charles Leonard Construction Company, Inc. From there, it grew into a full service miscellaneous metals/ornamental iron fabrication shop.

Today, we employ over 30 talented and dedicated industry professionals. Our goal is to build long-lasting relationships with our clients through quality, service, and dependability.

The creativity and imagination of our certified welders and design staff is on hand to meet all your steel fabrication needs.
